AWWAM Environmental Laboratory Services (AELS)

Environment Monitoring at AELS

AELS Laboratory team conducted an ambient air measurement and boundary noise monitoring at our laboratory facility and the surrounding environment on 05 & 06 November 2019. The purpose of the monitoring is to obtain background levels of airborne particulates and noise released by laboratory activities and the surrounding activities against Standards Guidelines limit imposed by the Department of Environment (DOE).

The results show the ambient air quality and the noise level are well below the Standards Guidelines limit set by the DOE. Below are the results of the monitoring works.

Parameter	Unit	Results	Limit
Total Suspended Particulates (TSP)	µg/m ³	121.3	260
LAeq - Daytime	dBA	54.4	65
LAeq - Nighttime		45.9	55
