AWWAM Environmental Laboratory Services (AELS)

#### Waste Characteristics Analysis (WaC)

Scheduled wastes are any wastes that possess hazardous characteristics and have the potential to adversely affect public health and environment. In view of the latest directive from Jabatan Alam Sekitar (DOE), Under sections 31 & 37 of Environmental Quality Act, all waste generators must conduct Waste Characteristics Analysis for respective waste codes.

We currently do offer Scheduled Wastes testing service according to testing parameters required by DOE, with competitive pricing. We are able to analyse your scheduled wastes in accordance to the DOE's requirements.
