SW Characteristics

A waste is considered hazardous if it has one or more of the following characteristics:

Examples:

SW Code	SW Name	Characteristics
SW 206	Spent inorganic acids.	
SW 306	Spent hydraulic oil.	
SW 322	Waste of non-halogenated organic solvents.	
SW 404	Pathogenic wastes, clinical wastes or quarantined materials.	

What are the characteristics for
SW 402 & SW 412?

1. Ergonomics and its risk factors

ERGONOMICS is "A field of science that tries to harmonise the system of work with human capacities".

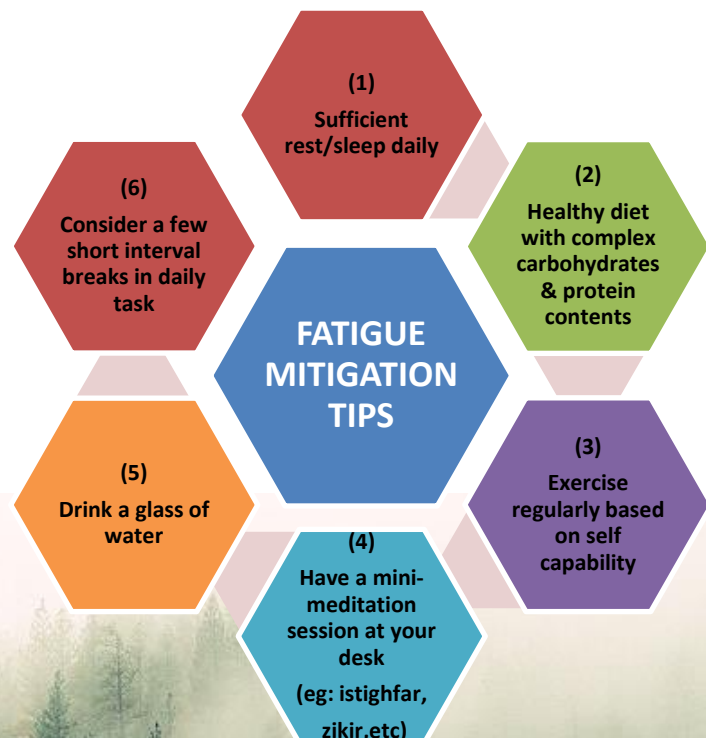

Six popular ERGONOMICS risk factors:

- Doing **repetitive work**
- Use of **excessive force**
- Improper or static **body posture**
- Work in **long duration**
- **Vibration** due to hand tools
- **Contact stress** on the veins, muscles & tendons due to hand tools

2. Recommended Self-Fatigue Management

What are the signs of fatigue at work?

- Moodiness
- A decrease in productivity, lack of motivation
- A lack of concentration and increase in judgment errors, such as accidents, excessive risk taking, and failing to respond to changes within the surrounding environment
- A loss of memory or the inadequate ability to recall details
- Drowsiness, loss of energy, inability to stay awake or focus on tasks for longer periods of time
