Occupational Safety vs Process Safety

As AWWAM has introduced Safety Courses (i.e. OSH and Process Safety courses) to the industries, let us find out the differences between these two interesting subjects.

Criteria	Occupational Safety	Process Safety
Frequency of Incidents	Higher.	Lower but serious impact.
Potential Hazard	Associated with individual such as trips, slips and falls.	Unintentional releases of chemicals, energy or other hazardous materials such as fire, explosions and pollution.
Protection	Individual (workers).	Workers, assets and the public.
Focus	Changing an individual's behaviour.	Changing system design in which behaviour occurs.

Safety First
Be aware! Take care

Check out Safety Courses available at our website
www.awwam.com

Health, Safety & Environment (HSE)

Safety Moment

Mar 23

Good safety attitudes to live by:

- An accident can happen to me at any time, when I take a chance.
- Accidents can always be prevented.
- To work safely is a mark of good sense and skill.
- We can always take the time to work safely.
- If I practice safety, my co-workers will think well of me—and I will be at ease with myself.

Microsleep ??

Image source: Ministry of Health (Malaysia)

Microsleep adalah keadaan di mana kita akan untuk <1 saat sehingga 30 saat tanpa kita sedari. Microsleep yang terjadi terutamanya sewaktu memandu sangat membahaya kepada keluarga

Faktor berlakunya:

- Kurang tidur
- Tersenguk-senguk
- Kelopak mata semakin tertutup atau kuyu
- Tatapan kosong
- Lupa kejadian di waktu-waktu terakhir

PENCEGAHAN:

- Berhenti seketika untuk tidur 20 minit
- Berbual dengan teman seperjalanan
- Tubuh badan digerakkan
- Mengambil vitamin atau kafein

Microsleep adalah keadaan di mana kita akan untuk <1 saat sehingga 30 saat tanpa kita sedari. **Microsleep yang terjadi terutamanya sewaktu memandu sangat membahaya kepada keluarga**

Faktor berlakunya:

- Kurang tidur

Tertali penat

- Jadual tidur yang tidak menentu
- Badan cuba melawan rasa mengantuk

PENCEGAHAN:

- Jangan memandu jika mengantuk
- Bertukar pemandu jika boleh
- Dengar radio
- Rehat yang cukup sebelum memulakan perjalanan
- Berhenti seketika untuk tidur 20 minit
- Berbual dengan teman seperjalanan
- Tubuh badan digerakkan
- Mengambil vitamin atau kafein
